

Dear Member,

You will soon be joining the ranks of those who have endured the tenuous process of earning one of the most coveted ranks in the Martial Arts world: The Black Belt. You have worked hard and learned much about the Martial Arts, the great people and teachers who have supported and stood by you and perhaps the greatest part of your journey has been learning about yourself and your potential in the world.

As a Black Belt candidate/Black Belt you are now eligible to enroll in a worldwide organization that seeks to put its members on a "life success track" to insure their future success, not only in the Martial Arts but in its member's future in education choices, professional development and life and leadership preparation.

Black Belts America™ is an international Martial Arts and life skills education organization committed to improving the world through its Black Belt emissaries. Black Belts America™ is represented by Black Belts from all Martial Arts styles and organizations with the common qualification of the attainment of the Black Belt rank and the commitment to preparing its members to excel in their educational development and professional skills.

Imagine Martial Arts classes that qualify for college credits or classes that bring in presidents and CEO's of major companies to teach real-life professional development classes. Or how about classes where colleges and companies come to recruit individuals like yourself, martial artists, with proven skills in focus, determination and self-discipline.

Black Belts America™ is an exciting and rapidly growing organization that will soon sweep the nation and become renowned for its members' contributions to their communities. Black Belts America™ builds teachers, leaders, and heroes and we are asking you to join us in that quest.

Sincerely,

Your Master Instructor
